

# Seminar: "Barrier-Free Design: A Daily-Life Perspective"

The United Nations Conventions on the Rights of Persons with Disabilities has been introduced in Hong Kong since August 2008. In addition to public education that promotes equal opportunities for the disabled, innovating barrier-free products will turn the Convention a reality in our daily lives. SVHKShare will invite prominent speakers from various industries to share the latest market information and world trends on barrier-free products. We firmly believe that this growing market for barrier-free products already exists in Hong Kong. What needs to be done is to identify the market so that this social need can be fulfilled sustainably.
